V. 3. Dath Ged pervert judgment? er deth the Almighty pervert juditer? I in this verie is laid down the ground of Bildade following diffeourfe, which afterwards he applyes to Job in particular. He labours to prove, that God deals uprightly in giving good things to good men, and punishing evil men; and concludes from this general course of Gods dealings, that Job was juftly afflicted. Thy words run, as if thou, O Job, didft accuse God of doing thee wrong, in laying these plagues upon thee. Thy freeches look that way, as if thou dieft think fo, though thou dereft not fay fo in plain terms. But though God be throng and by almighty, yet will he not do

Job desires that he may not be thus terrified, because he knew that men kept in awe could not plead their own cause well. Fear hinders them. Many have loft the day being terrified by the Judges, though their cause were just. This is that Job sears in Junges, thought their caute were just. Aims is that job clears in this place; and this being removed, he professed in the next verse, he both could and would speak for himself.

That is, Fear hath put me clean out of my felf, as ver. 21.34. And I am not yet come ro my felf, as ver. 21.34. And I am not yet come ro my felf, Luk. 15.17. So that I know not what I fay, and therefore am no way fir to plead my own cause. Or, For it is not fo with me: As Gods scourge seems to make me, and your speeches would make others think of me. So is translated for, Chap. 33. 13. Or, For I am not fo with my felf. My conscience tells me, I am not the man you take me to be. It is not inward guile, but outward pains and afrightments, that keeps me from speaking in my own desence. If they were that keeps me from speaking in my own actence. If they were gone, my innocency would minister boldnesse to me, and ye should see what I could say for my self. Some read it, Because it is not so with me. And knit it to the words following, as if Job had faid, Seeing ye will not pity me, nor God relieve me, I will no more complain to him nor you, but smother my grief in my own foul. But this interpretation croffes the division: of the Chapters, spoils the sense, and makes Job a liar, who complains again very bitterly in the next Chapter.

I am full of confusion 1 The word full, or fatisfied, argues abundance. I am as full of confusion, as men are of mear, that defire no more. So the word is used, Gen. 25.9. Job 14.1. The word confusion, in the Original, comes from , , to rof, Jer, 29,23. which is the greatest of torments. None like fire. Jer. 29,23. which is the greater stollment. Note the mit of blufts outwardly. Confusion filed him because of his sfilled one, and the hard confuses of his friends. Confusion is more then thame. It distracts the mind, and makes a man not know which way to take. So it was now with Job. Or it may be meant in respect of the shame that fell upon him in regard of meant in rejects of the hisme that real upon num in regard or his fall from fogreat riches, to fo poor an eftate, which made him to be contemned by those that homoured him before. Some read it, Be thou fatisfied with my configure. As if he had spoken to God to intreat him not to lay more trouble on him, but to rest satisfied with the confusion his friends had brought upon him already. But the first reading is better ; neither is the word him, in the Original. Men are faid to be full of confidenthat are overwhelmed with shame and contempt, Hab. 2.

wisdome. There neither is, nor appears wisdome in filence properly, but in speech. It may be taken comparatively; Ye would shew more wisdome, that is, lesse folly; for you would would ince inore midding that is, selectory; for you would not discover the vanity of your hearts, if ye did hold your peace. So the fooisimalle of God, I Cor. 1.25, is put for that action, wherein God least sets out his wisdome; for there is no folly in God. Or it may be meant in regard of other mens apprehension. Men would in charity judge you to be wife, if your own words did not bewray your folly. Suitable to Prov. 17, 28.

V. 6. Hear now my reasoning, and hearken to the pleading of my lips He doth not bid them be gone, though he bid them be filent: but would have them to stay, and not be ashamed be literated from him. Yet with reproof of their ill plead-ing for God, he mingles paffionate and diften pered speeches; as ver.13,14,8c. Socasie is it for us, especially in afficient to show our own passion, where we have just cause to reprove others. As it is decent for you to hide your own folly by fi-lence, so it is profitable for you to learn, by hearkening to me. Forasmuch as I have heard your accusations patiently, I befeech you give me the hearing while I go about to disprove them, and confute them, and fee what arguments I can bring in defence of mine own cause, and to secour your er-

He compares them to corrupt Lawyers, that pleading for some wealthy or potent Clyent, care not what they say to opperfice others, the it right or worms, so they may earry the cause for their Clyent, and procure or retain his favour. So Job chargeth his friends here, that they did not look into the cause it less, nor fearth what was right and ruse. else they needed not to have made him an hypocrite to clear God. And verthis overmuch care would not be pleasing to God neither. So well can we speak in reproving others, but inadvifedly in our own forrows.

7. Judg. 16.10. The word 2/3/3, imports a weak or forty man. The thing Job accureth his friends of, is not deciding man. In thing, job accused not strends of, in not certaing of God, but dealing with him, as corrupt Lawyers do with their Clyents, pleading their cause by bad arguments, and so making them lost the day. So they laboured to maintain Godinatice by defending, that God did fillist and but hypoetites in that heavy manner, as he did Job, which was an untrult; and fast Gody justice had no no better pillars, it must have fallen to the ground. Weak men may be thus deluded by their advocates, but the alle feeing God cannor. Or it may be read thus; Or as ye moch a man, will ye moch bim? That is, though ye might so delude a weak forty man like me, yet do not think that God can be so mocked. Ye will find the contrary in the end. Gal.6.7.

The Author of this book (the immediate and scondary the mean, besides the original and general of all true

The trust is, they are not all David Platines some having been made before, and some long after him; is shall be Record in due place. Neither is that to be trusted to, as a general rule, that those onely are Davids, that bear his name in the title or beginning, fince (besides other reasons) we find some in other places of Scripture directly asname is he the beginning price name prefixed , as PNL-2 ACT 4.25, However, to make good this title and in-feribation, it is enough that the greater part were made by David, and others by him (as is generally believed) colle-Hed into one, and appointed or fitted for publick use.

Castander, a moderate Papili, speakes of is with much indignation ; Quid, quod totum Pfalterium sublato ubique Domini nomine, in nomen Domina commutatum legitut ? Neverthelesse, the book is in credit among the vulgar; and that it might be of more vulgar use, is tran-Stated into volgar tongues. What hath been here cited, is taken out of the French translation, printed at Paris; 1607. The Original Latine is extant in Kemnitius his Examen.

The use of the Psalmes (common and practical) is twofold: Either for a daily exercise of devotion, and divine Woorlish, whether private or publick, or for particular occasions and occurrences, whether private or publick, ac-cording to the subject and argument of every Psalm.

For the first ; that the Pfalmes (not to speak of boly fongs and hymnes, long before David used upon extraordinary occasions, as we find recorded in the Scriptures;) as they were partly composed, and partly collected and put sogether by David to that end ; so were ever fince Davids time used as part of Gods publick service among the Tewer, is not questioned by any. And that this wife of them did consinute among Christians since the first Planta-

Pfal. i.

tion of Christianity in the world, may appear by the most ancient records and moniments of those times that remain unto this day. As for private devotions, though we will not condemn the use of other late books and helps, knowing what variety there is of spiritual as well as sensual palats and appetites tyet we must be allowed both for profit and delight, to give the preeminencie to this Divine Book far above and beyond what joever, that hath been fince, or shall ever be invented and devised by humane wit. And as we give the preeminence to the Psalmes; so after the Psalms to those Books of private Devotions, above all others, that are grounded upon the Psalms especially, and go along with them, or take them along; as I have feen some. Now for this use, whether publick or private, the reading of nanomer meg senon memg, son a nave premjeme. At om for this suferible publick or private, the reading of the Pfalmes in order, at commonly displitably certain portions, as "is most ordinary", so, except there be extraordi-nary occasion; is most profitable.

The seconduse, we said, was upon especial occasions and occurrences, such as this life doth afford many, both publich and private, according to the particular subject and argument of every Psalm. Now because such occasions, as we faid but now are very frequent, and that all men are not so well versed in the Psalmes; or, though well versed, have not that indement, at to discern of themselves what Psalm is fit and proper for every particular occasion. wherein neverthelesse the chief ase of the P salmet doth mainly coulds: many divisions have been made by divers. both ancient and late, and disort: Tables fet out to that purpose, representing the Psalms digested according to their several subjects and arguments. The most ancient Table now extant in that kind is that of Athanasius, an ancient Greek Father; and though divers have been set out by others since hims, yet I know not any that hath been more copieus and accurate in that kind, then he, as may appear to them that shall peruse him. But of all those Tables in veneral it milt be considered; First, that difference of translations, as it must needs breed diversity of Expositions. To some diversity of applications too to particular occasions. Neither is this diversity observable in ancient translations onely, compared with modern; but even in and among later translations also. So, for example, in some Tables
of that kind, that have been set out by some learned men, We are sent to the 41 Psalm, to learn that we should not judge rafuly and uncharitably of the just and righteous, when he falleth into troubles and adversities. There indeed, according to the translation and exposition which we embrace in these Notes, we shall find a notable lesson to that purpose, as may be seen there: but according to some other both translations and expositions (Blessed is he that considereth the poor co which feemes to import relief and succour onely: ) little or nothing to that purpose. Secondition must be confidered that the Argument of many Pfalmer is mixt and various, fo that the fame Pfalm may be reduced to feveral titles according to its feveral parts; at Petitorie Deprecatorie, Imprecatorie, Eucharitical, mother like: So that it is no Wonder if all I ables do not agree in their indications. However, for the help and direction of thems that are not so able of themselves, we have here set down some few generals of most common use, to which divers Psalms may be referred. They that desire a larger direction may have recourse to Athanasius, in his Episte ad Marcellinum, mei sie Equi e , &c. where they find stauble Table, very copiess and accurace both and both tending to one effect. Salm fielt | That this diftribution or division of Pfalms into first, fecond, &c.is ancient nav authentick may ap-SC.1. Section, any authentics, may appear by AG.1.3. 33. as it is a flow intenin the fecond Pfalm: though iome quetion be made by the most learned
(whereof bee in Beza upon the place)
of the right reading of that place. However, that the whole Book is, and hath been of old divided into 150.

Pfalms, the learned, both lewes and others, do agree; but of the division of every particular Pfalm, to make up this number, there is not like agreement. The first and second Pfalms are by most Ancients reckoned but for one, to wir, the first; who also in that place of the Act, 13.33, had it in their copies, in the fif; not as it is now, in the fecond Pfalm. Some of the learned Rabbins also would have it so, and give some reasons why these two (as we reckon them) should be but one Psalm. Again, the two (as we recton them) month of the more plant, negative minth Palam with us, in the Greek and viligar Latine make ewo, the ninth and the tenth: So that from that place, to Plaim 147, where we agree again) their account exceeds ourseon family by one. Other differences there he in fome other Palams of lefs moment. As therefore we hold it fafeft and fureft to follow our ordinary division; so we need not press it upon others too rigidly, or to build upon it as canonical, fince for much can be faid on the other fide. See more upon Pfalm 96

at the beginning.
This first Plaim, according to our division, is by divers of the Ancients rather taken as a Preface or Introduction to the whole Book, then as one barely; to wit the first of the number: by which (whether Pfalm, or Preface) the happiness of man, what it is and wherein it consistently declared. Indeed it hath alwayes been accounted the part of a prudent wife man before he betake himfelf to any ferious work, to confider first of the end, and what reference it hath unto it, that accordingly he may be flow his pains more or less, as he fees it more nearly and immediatly, or otherwife, to tend unto the end. Now the main and general end of all men, is happiness, or blessednisse. And therefore the wifest and most renowned of all ancient Philosophers, his two best pieces, (both for use and accuratences) his Ethicks and his Politicks, he begins with this very confideration of the end, laying this for a foundation. That all men defire to be happy. Now that is it that we are here taught by this first Pfalm, what is true (though not according to ordi nary judgments perchance) and real happinelle, and what i not: a way of this happinesse being also shewed and proposed to them that thall make a right use of this Book.

Vers. 1. Bleffed] The original is plural; which neverthe-be joyned (and so rendred) with either plural or fingular. But be joyned (and to rendred) with either plural or fingular. V. 3. And be shall be like a tree The happiness and prosperity of the godly is here fet forth by a fimilitude : which although according to the measure of knowledge in those dayes, and the promises of the Law, ( subject nevertheless to many limitations, as we shall have occasion to shew afterwards) may admit of a literal interpretation alfo; that is, may be under-flood of temporal prosperity, according to that of the Apostle, That Godlinesse is profitable unto all things, having the promises both of this life and of that which it to come, I Tim. 4.8. Yet is not this the happiness or prosperity principally here intended; but that which is permanent and eternal. To which also, not reason onely, but the very words, if well pondered and exa-mined, do lead us. For what is the greatest prosperity that this world doth afford, or the longest life of man, or what account to be made of it, bur, according to the Scripture, as of graffe, and the flower of the field, Ela. 40.6. which in the morning flourished and growth up; in the evening is cut down and withereth, Pfal, 90.6. See also Pfal. 103, 115, 16. And what account David himself made of it appeareth Pfal. 29, 56, & Pfal. 62, 9. which even they, who hereafte they are the second to be a control to the control t they, who because they had no certain knowledge of any better after this, had most reason to make the most of this present world, and the goods of ir, have freely acknowledged and expreffed in many pithy fentences and speeches, comparing all humane felicity to a shadow, to a dream, to a bubble, &c. So anoted and incurrent into the cycs of all with men hath this truth ever been. This fenfe therefore, as principally intended, and most proper to the place, we shall heaceforth insist upon, in the following words.

But this is too abfurd, as to need any confutation.
If there were any appearance of evil in these words, as it seems they conceive, that are formuch offended at them; shey might have confidered, that we are to forbear, not only that which i nave considered, that we are to foreear, not only that which is evil in it felf, but even that (where no indispensable duty doth bind, nor consideration of agreeier good doth preponderate; neither of which can be aid of these words, by them that are offended at them;) which hath the appearance of evil. But this conceit is not fo abfurd, but theirs ( though not more true, conceit is not to ablurd, but theirs (mough not including perchances) may be accounted as wirty, who would have Christ to have repeated this whole Plain, langing upon the Croile, or a good part of it, and fo to have untered thelewords (which only are menioned by the Evangelist, they fay, because they are the first of the Plain, as is titted in quotations;) no otherwife then by way of repetition or meditation. I would not fay, what some do, that it is not likely Christ would repeat so long a Pfalm, at the Croffe :I have read of divers Martyrs that have a Plaim, at the Croile: I have read or divers marry's that have repeated the whole Te Drum at the flake, or going to it; which is not much lefte in length. But the words of the Evangelists, if looked upon, are a fufficient confuration of this opinion; who fay not, (neither of them that record them;) that Chriff upo ay not, incince of them that economic them; that Chilli plake, or repeated, but, cryat with a load outer. Many of the ancients have faid, that Christ spake these words, not in his own person, properly, but in the person of whole mankind. Which indeed is true enough, in some since; but in that sense they mean, to free Christ in uttering of them, from all trouble of mind, or sense of grief, or fear, I cannot allow of it. They might as well say, because he suffered not for himself, but for mankind, theref ire he felt no pain. Yet this is more tolerable by far, then to fay, that the Deity of Christ, did withdraw it self at that time, fo that there was a real separation ; and from that feparation, this confusion of the humanity left to it felf. By thefe, and divers other expositions that we will palle by, doth appear what men have thought of the literal fense of these words, which they have been fo folicitous to avoyd. But offence, and yet to preferve the literal fense. That Christ, as man, (though God and man fill, bur the Divine nature by

influence for a while;) did fuffer partly in his body, and partly in his foul, (but more in his foul, then body) more then can either be expressed by man or imagined, I do not see how any reasonable man can question, that reads the story of his psssion, from his bloody (wear, unto the end; and considers Christ his own expressions, recorded unto us to that very end, that we might know how much he hath fuffered for us. I will not fay, that there was a necessity he should suffer so much, just so much, both in body and soul, to make his sufferings available to our redemption, both of our bodies, and of our oules. This I dare not fay because I have no warrant for it in Scripture ; and bare humane ratiocination in thefe things, is mere folly and madness: It is enough for me to know, that God had appointed it fo, and in humility to adore beyond what I can understand But that Christ did actually suffer very much even beyond what can be conceived, I believe, as I bemuch, even beyond what can be conceived. I believe, as Inci-lieve the Scriptures. If then his fufferings were extraording-ry; why fhould not his exprefitions be fo, by which we might understand (fo far as can be conceived by man) the greatness of his pangs and agonies ? In this cafe, fuch words as thefe, My God my God &c. were words of fense, not infidelity. Neither are fuch expressions inconsistent with a perfect fecurity of are turn expressions monitisent with a petrect security of Gods love and favour, at the sime time. There may be a con-tradiction in the language of sense, and that of faith, if in themselves considered, but no such monofishence in the nature of the things, from which that variety doth flow, but that they may meet in one. Doth not Ecclefiaftes in the fame claufe. may meet in one. Doth not rectentates in the same cause, and with the fame breath lay, Though a finner do evil, and his days be prolonged; yet I know he shak not prolong his days; Eccl. 8.12. and the Prophet Habakkus, of his vision, though it taryit will not tary? (Hab.2.3.) And even Plato, a heathen Philosopher, among them that were led by sense and reason onely, of greatest account, in one of his Dialogues called Philosopher, among them that were led by sense and reason don, towards the end of it, tell us that ar the same time a man may believe , and not believe ? And why not a man in man may believe, and not believe? And why not a man in fisch an extremity expeditules with God that he hath forfaken him; though his heart and faith tell him at the fame time, that God hath not, will not forfakehim? And indeed, if we mark it, (it is observed by most Interpreters) the very words marks. Also observed by most interpreters) the very words imply as much, and interpret itemfleves. For at the fance time that he faith, God hath furfakes him, which his fense, and the violence of his pangs expetifed from him; he calls him his God, (My Gd, My Gd, My Gd, M) argument of his faith: to which agrees well that of David in another place, But I trying in thee, O Lord: I faid, thou art my God, Pfal. 37.14. And if this be not fatisfactory, confider we the words, first as spoken by be not faitsfacory, confider we the words, titt as spoken by David, and there we finde in the fame Platine, (ver.4-4). For he hath not defived, me abbured the afficilism of the afficiled, neither bath be tid his face from him, but when be cried until be beard. Again, confider them (which is our chiefest business be beard. Again, confider them (waith is our chiefert buinness here) as fooken by Chrift, (though it may be supposed, that he spake them in no other sense then David did: ) and you shall hear him soon after, (as in Saint Luke we finde) saying, Father, into thine hands I commend my foirit, Luk. 23.46. Why then should any offence be taken at the words ? But because Christ was no ordinary man, and that to bear any pain or Chrift was no ordinary man, and that to bear any pain or griefe, without any figne of commotion, hath been thought by many to belong to perfect magninity, and higher of pir-rie, befides which already been faile, that what chrift did fuffer, was quite of another kinde, fo far above the mediure of ordinary inferiors, as a hindid was above to draw years of further briefly fay, that Chrift was place than the following citing and the common of the co riccing; 1 totat, 1. That no migrat new name the percent true mans; (a thing not easily believed, as appears by the multi-tude of herefies about his nature, that (prang up from after the fift plantation of the Chriftian faith), there being no greater evidency to ordinary judgment, at leaft, of his perfect humanity; then his being judyed to the common infimities of manity, then his being lubject to the common infirmities of man, fin onely excepted. 2. For our fakes, to keep us from utter fainting, and defpair in our greateft trialls, combats, and afflictions, whether fpirituall, or corporall, when God feems to forget us, which awing the comforts of his grace, and the benefit of his help, as fometimes he doth, even from the beft, and his best beloved for a while; that then remembring what Christ himself, so neer and dear unto him, was put to, we might have comfort. And although this of Christ's sufferings were an extraordinary cafe, not liable to the rules of ordinary humane ratiocination; yet for them that think a Stoicall apathie, or unpaffionateness, to be the greatest evidence, or character of true magnanimity, I shall commend unto them the disputes of two famous Philosophers, recorded by Aulus Gellius, a known ancient Writer, in the 19. book of his Nottes Attice, (fo called) cap. 1. & 12. The Hebrew word Ppy fignifies to will; and also, to delight, or, this pleasure in a thing. The Septuagint desirous (as in many other places) to keep to the Hebrew as close as they could, onter paces) to keep to the Hebrew as clofe as they could, trenderad: by the Greeds 'Shere,' intending thereby doubtlefs the fame fenfe, to delight, or take pleafure; though the Greek word of it felf, according to the propriety of the Greek tongue, fignifieth, to will, onely. It is well known that there are infa-nite Greek words, uted by the Greek transfations, in another nite Greek Words, tited by the Greek translations, in another featife, or notion, then that which is proper unto them: which as they are used by them, are commonly called beltenistical words. Now the Evangelish we know, used for the most part, the translation of the Septuagent, as that which was then commonly received among the Jewes; and which they were so used unto, that their Greek often hash more of the Hebraifme, then it hath of the Greek, that was accounted true by aiming, other tenam or one Greek, thus was accounted true Greek in those dayies. These things confidered; Mar.2,1,3, where this passage of the Pfalmist is used, of binar as 1/bz, should not have been translated, if he will have him, which doth much obscure both the fense, in it fell; and the reference the words have unto this place; but, as it is here, fring he delighted in Ming. or, as it is in the margin, if he delight in him.

Now our Hebrew Bibles, all that ever were printed, (one or two editions, as I take it, excepted) bear, not 772 soderunt, which is our Translation, and is of all Christians, generally; but as a corruption of the Bible. But we answer, that though all Hebrew Copies, of later ages, have it fo indeed, as it is common-Ty printed yet fome ancient Copies, as by their own testimony is proved, had it and (with a Vau) not and (with a Jod.) as it is now. Now and and is all one in fenfe; all the difference is but of one vacant Aleph, which in many places of Scripture belides this, is added to words, without any alteration of fenicat all; as the Jewes themselves, must, and do acknowledg. Verf. 1. Buffed is he whose transgression is forgiven, Sc. ]
These two first verses are cited by the Apostle, D thefe two first veries are cited by the Apollie, Rom. 4.7,8. and it is upon a Pecial cocción, to confirma doctinico of great confequence, by him delivered, to wite that an is not justified by words, but by Faith. Even as Devid affe, faith the, deferibeth its kilfedraffs of the sam, natur whom God impatter injectucajust evitate wavel; fajus, Milles are they whole injustice are fargivent, and whole firm are covered helf-fait into most whom the Last well was injusted for the control of the control righteousnesse without works; so elsewhere the same David describeth the blessednesse of the man, that walkets not in the

also this Bleffed, as here in the words alledged by St. Paul, is twice repeated to the same purpose, Bleffed are they that keep bis Testimonies, &c. and what is all this, but to describe the nes rejummure, see. and what is all time, but to deterible the belieflenefiel, according to Se Pauls inference, of him that worketh? It will be fish perchance, that David's purpose was to detribe, as in those words alledged by Sr. Paul, Evan-gelical, so in these, Legal belisheness: herein differing, because the one grounded upon Faith; and the other, upon Works. But this though we allow of it, in due place ; ver that David by these words intended the description of different bleffednesses we cannot allow. Our reason is, because this difference of words may be oblerved in Sr. Paul affo, whose aim certainly was not to establish divers formetimes Legal and fomerities Evangelical , but one, and the fame bleffedneffe. What can be more plain, then what is at large, and with much vigour of exprefiton delivered by him upon this fab ject. Rom. 1.6,7, &c, That, God will render to every man according to his deeds: To them who by patient continuance in well doing, feek for glory, and honour, and immortality, eternal life: But unto them that are contentious, and do not obey the truth, but obey unrightethat are contentious, and cons cost to train, vui one amy sub-ouffulle, migration and write, tribulation and amyulf, &c., as followes there, ver. 9, & to. Store of other places there is, to the fame purpose, which I forbear, because believing enough. Hence we conclude, that it was not S. Pauls pur-poseabliquely to deny, that beliffedness came by good works pose anotometry to acroy, that disperience came by good works also, which both David and hindlef leftwhere so clearly each: but his aim here being to show the formal cause of blessedies; from this blessedies; or, to speak more properly, from this consideration of blessedies; he excludes works: faith and works being in this cafe opposite , which works; rain and works being in this care oppoints; which otherwife, in point of bleffedneffe abfolutely confidered, are inteparable. And because as David describes bleffednesse by righteousnesse, and holinesse of life; so also, by mere imputarighteoutheffit, and holineffic of life; to allo, by mere impurison of righteouthfeet spon which might plantally be grounded this diffinedion of the formal, or efficient; and the influencest cause of bleffeneries to make su the of that paffige which was to his prefent plupofe, leaving it to his readet, by comparing of differing places, to diffinguish, a we have done, and to to reconcile both front David, and himielf bunn others companing et differing places, to distinguist, a we have done, and for to reconcile both froch David, and hairfell jumo chemicities. We might also diffitinguish of works, which may be defined to the place of the p them may be feen in Fagius.

But They remarked me evil for good, to be sholling of my load. But one this is of an higher contemplation. In a more plain way, among christians, at least, as I conceive, the same may be done. among cintitians, at reat, as a concerve, the name may be unter-for granting that every man, by statue, is to love bimileft beft, and to prefer his own good, before any others: (wherein religion and readon agree well enough, if in the word love there be no mittake; that is, that we take not love of the body, and of this prefers wastd, for love of the foul, and ofterenity) and that abfolutely, or generally, it is lawful, as it hash always a quence, to require evil for evil left by bearing one injury, we expose our selves to a second: yet this must be granted also, and it necessarily followes upon that first principle, That E dushus malis manimum: of two evils nature doth prompt to make choice of the lest lipon this very principle of nature, the Epicureans (as may be feen in Dia. Laertius, and others) who precended nature in all things, taught, that we should forbear precended nature in all things, taught, that we fnound torbear namy pleafures, to which nature doth lead , not as pleafures, but as the cause of greater evils. Hereupon it will follow, that as many as believe, that there is a reward of good to them that beep the commandements of Good, either in this, or after this life, of far more valuable confideration, then the pleasure, or profit of revenge can be; as also a reward of evil to them that do nor much more to be feared, then any evil, or inconanat ao not, much more to be teared, then any evil, or incon-veniency that ean come to us, by neglect of revenge, and for-giving of injuries: it will, I say, upon their grounds of nature necessarily follow, that such as love their own good, by nature; necetiarily follow, that tuch as love inter own good, by muture; and as rational creatures, which is the proper nature of man, by which he different from bruits; reason) know; that they are not onely to provide for the prefent, but for the future also, and accordingly to make their choice, as they see mer ann, mu accountry to make their choice, as they fee cause; that fuch, I day, upon grounds of reason and nature, must and will rather neglect and patie by injuries done to them, by men, then re incur the wrath of God, who hash in the New Testamens, we are faire! Certainly, many of those imprecations, with some alteration of the tenses, (which in the Hebrew tongue is ordinary enough) for the Optative, or Imperative, being pur in the Fu peculiar manner. It is the fin of incompaffichames, or irre-lenting cruelty, when men taking the advantage of others mifery, purfue vengeance to the utmoft, & fill the lower their enemy is, and the more uncapable to relift; the more their tage and malice increaseth against him. This is much 3 but there is a degree beyond this, when a man doth this to another; not is a segree ocyono reas, when a man ooth this to an energy, not out of any revenge, or provoked by any wrong or injury, sighter real, or imaginary; but of pure cruelty, and pleasure that he takes in doing mifchief, and to fee waters in mifery. Nerf. 1. FRet not thy felf because of evil doors; &c. ] The arvindication of Gods providence concerning the prosperity of the wicked, and the afflictions of the godly in this world. It is an argument that hath been handled by many Philosophers of old 1 by Seneca, a Latine Philosopher, Gur bonis male fit, &c. out 30 Seneca, a Laune Philotopher, Garbons male fit, &c. among the reft, to the tumoft of what could be fail by a heathen, fingularly well: and fince that, by many Chriftians. There is not any fubject indeed, of either more confequence, or profundity: and could all feruples and doubts be well refolved to the fatisfaction of common capacities, as well as of others ; it would make a great alteration in the world, and lives ofmen; vice would not be fo predominant, and virtue more in request. Yet among Christians, throughly and really possess with the principles of faith, as of the immortality any poner with the principles of rain, \$a\$ of the immortality of the foul, a refurrefilm on of the body, a day of judgement, and the like; the matter is of no difficult refolution i liany for principled, are much feandalized, it is not fo much because they cannot be fatisfied, as because they will not take the they cannot be Jatished, as because they will not take the pains, or allow themselves time to consider of it feriously. Many also cannot be fatished, not through any defect, either of information, or understanding, but of a godly minde and life. Lewdacsse and profancise, when once they possible the heart, they either put out the light of the understanding, or at least hinder the fruit and operation of it. But we are not here to treat of providence in general, but onely to confider what David faith of it, what against it, and what for it. He handles the point in another whole Pfalm, besides this: the 72. Truly God is god to Ifred, &c. if that Plalm be Davids, as 1 think it is, though by fome afcribed unto Afaph, because of this name there before it. And again, but give obscurely, in the 49. Plalm, Hear, this all ye people, &c. and ore briefly, Plaling 0.5, 6, 7. O Lord, how great are thy works, &c. Divers Chapters in Jobare of this subject; as 24. 27, and some others: it is one of the chiefest subjects of that Book. In Jeremy also, and Habakkuk; the 12, of the one, and the first Chapter of the other, there is somewhar. All whom I mention the more willingly because they go much one way, both of expostulation and answer. The main of the answer is, which we thereon and answer. The main of the answer is, which we there-fore are the more particularly to weigh and examine, fift; that though the prosperty of the wicked be great, yet their overthrow is as studdain and terrible: and more generally, that their prosperity is but a seeming prosperity; not really and truely what it seemeth. Why so? Because their life is but a blaft, their pleafures foon over and forgotten: for their very brevity, not confiderable. But is it not fo with the temporal prosperity of the religious and godly too? Is not their time, generally, as thore; and their pleasures, or worldly goods, as passing and transitory? If those very places, where they speak of the prosperity of the wicked, particularly, do not timely generately, as most a measure presentate, or noverany and une genous man usuamge of time and conceive, effects goods, as palling and transitiony; if fused every places, where and different to goddlinelle; to which, as I conceive, effects of the profileriny of the wicked, particularly, do not ally, the Apollic (whole main work elfewhere, is to prepare tire! but 16, yet there be other places or 5 originare, many, that; true Christians for crude and robulations in this world allustrates. fwered and cleared; that the righteous and religious how they fare in this life, is not to them confiderable, because they do not expect their reward in this life; their happinesse therefore, not to be measured, by what they enjoy in this world.

And what is a man profited if he shall gain the whole world, and
yet loofe his soul? Matth. 16. 26. What need more, to men that are rational, and know how to put a difference between a mo-ment of time; and error y? Surely Plato the heathen Philo-fopher had it not from Chrift, and much lesse Chrift, though fopher had it not from Christ, and much teller Carrist, though, many ages after, from Pites 2 Ver tession and common fense prompted this notion time Plato; and his very expedition comes very near to that of Christ, 3 "Abox 46" la 3" Any a 7" of the 4" year is 30" 3" in a saling 1" Existing 1", The saling 1" of the 4" of the would find for the Greece and all Barbary, thates, as there is no times the content to one with the property of the greece, for the builds would, Sectionage they find, or, thingle interface indicate us to believe. For if a short temporary life be worth so much, how much more eternal life > But I cannot be of their opinion; were it but for Christ his words, much to the same effect, Matth. 10.28. Fear not them which kill the body, but tre not able to hill the foul : but rather, &c. wheree think what by foul isto be understood, no question at all carlebe made. Il then this, or any thing equivalent (as there is choice enough tach this, or any thing equivalent (as there is choice enough in the New Testament) to this, had been answered, an infidel, or a Jew perchance (not a Christian) might have required farther Institution, concerning the immortality of the foul, &c. but this granted; of Gods providence, in reference to ungodly mens worldly profperity, there would have been no further question. But that time was not yet come. The Churchwas yer in its infancy; and the full revelation of the mysteries of Heaven and eternity, was reserved for another time. This was a mystery of Gods dispensation: and by what degrees that light was dispensed by God unto his people, Learned men have enquired, and shewed that Daniel was the first, who clearly spake of the resurrection; and that as the the fift, who clearly fasks of the refurection; and that as the ufferings, and perfections of the Church under Antochur, and others, increased; so did that light freed more and more, and the kingdom of Heaven every day more alleded among the Jewes, then before. Therefore Schridt failing the beautiful five and immerating to light to though the Golphy, Time, to, and Matth. 11.71, that he that is tag in the length. a Tim. 1.10. and Matth. 11. 11. that he that he leaft in the hing-dom of Heaven, is greater then John the Baptift. Not but that of old long before that time, there was followhat intimated in the Law and Prophete; and talked of among the godly Jews the Law and Frophets; and talked of among the godly Jews to that purpofe; but notanything clearly, nor with any certainty: of the wicked effectally, that they also should rife again, and give an account of their lives, and ac-cordingly be rewarded; this was a thing nor known then, but corangy to rewared; it is was a thing not known then, but the contrary stathe believed; as at this day among the lews. However, that fuch a one as David, fo godly, and fo belowdhad a firg greater knowledge of thefe things, then ordinary Jerses; and in flom refpect, then ordinary Christians, perchance; I make no quefficin. But what he know or believed; is one thing; and what he thought fiftor common knowledge, anothing and what he thought fiftor common knowledge, anothing the contract of th there. However some places there be that German many and what we thought there have to me places there be that German me, though there be that do not apprehend them so, very cleer; as Pfal. 17.14.15. Which is a way of reconciling many different, yea contrary speeches and affertion at truth; because as the experience of men in divers things, is divers, to because as the experience of men in divers things, is divers, to their opinions; and as their opinions, to their words. \*Pariat circat has opinion as ingine onjugue well ada; faith Pliny very well in a place, speaking of a much controvered matter. In this very point of providence, of the happinelle or unhappinels of the righteous, &c. in this world, men of good judgment and experience, fpeak very differently, differently deciding the experience, speak very uncertainty, unnecessity declaring to matter according to their own experience, which according to variety of times and places (befides other circumflances) may vary very much. But in general, to make the observation as general as it can be made; it must in the first place be observed, that all such either speeches, or promises, must alwayes be understood with an exception of times of general calamities, and inundations, as it were: for then (in point of suffering) all men, both just and unjust, even innotent children, as others, areftor the most part) equally involved. Wow this transferred being for the most part, as true of the prosperity of the just, as of the unjust, why here more particularly applyed to these, see before upon the full and second verses. Here also, in further confirmation of the fame, it may be observed that the very word here used, to palle away, is the word both by Sr. Paul, and St. lohn, used to fer out the vanity of all worldly pomp and glory, in general. A very proper word indeed it is to that purpose, as any that can be thought of; St. Pauls words, I Cor. 7-31. are, For the fashion of this world paffeth away. Where the word 94 ua, or fashion, is to the fame purpofe, a very pregnant and emphatical word, as by Greek Interpreters is excellently well snewed. Sr. Johns words, are not lesse emphatical. I Joh: 2,15, 16,17. Love not the world,&c. For all that is in the world, &c. And the world paffeth away, and the luft thereof: it followes, But he that doth the will of God abideth for ever. Where we have that antithefis, which (upon the first and second verses) we have spoken of, of the different condition of the just from the unjust, in point of worldly prosperity, (which by David and other Writers of the Old Testament is sometimes altogether omitted; sometimes obscurely pointed at, as by dwelling in the land for ever, verse 29. of this Pfalm; or the like,) cleerly expressed. V. 38. end of the wicked [hall be cut off ] The Hebrew word is not fo proper here, because it is more likely that as it is in the former verse, so here also it must be taken. But there, (the end of that man is peace, ) it would be very improper to take it fo; no reason therefore that we should seek a new interpretation here, which the fenfe requireth not; and would make the coherence worfe. The fame word FTIN, fignifies also reward, as Prov. 23.18. For furely there is an end, and thine expectation shall not be cut off. So there in the Text; but in the margin, reward: as by others also it is expounded. And so 710 in the New Testament is taken sometimes. This I note the rather, not that the difference of it felf, whether end, or rewerd, is much confiderable ; but the better to compare thefe remend, as much controlerable; but the better to compare these words of David, with a parallel place of St. Pauls; taking the next verticallo, (part of it; But the salvation of the rightests it from the Lord) as part: The words of St. Paul are these, For the words of St. Paul are these for the words of St. Paul are the salvation of St. Paul are the salvation

Lord.

When be cometh into the world, that is, when David represents 1. 6. So that the Apostle takes these words, and those that 2.6. So that it is point rake the feword, and those that to like with the point of Lawa, awag uncer me Law, was object as mucas any. But if this be all, the matter may be answered; and is indeed, by Mollerus upon this place, and others; though it feems their answers were not thought facisfactory. But what then (for it would be too long, to enter upon the queftion of legal feerinces, and their end, and to answer all objections) will they make of Jerem. 7. 22. It is true that Christ indeed is the chief object both of the Law and true that Christ indeed is the clust object both of the Law and the Prophets; and that his passion in this book of Palmes, and in the Prophets, is often spoken of to which this obcdience may be referred. But of his obedience or sufferings, I know nothing be reterred. But of his obscience of intering, a know nothing in the Law, but typically; and what is in the 1cfl, to this purpofe, is of a later date. And then for David, what shall be faid of him? Somewhat is faid, I know, to this purpofe; That alof him? Title.

She[hannim] An instrument of fix strings; as some would have bellemmed an intrinsent of in titring 3 as some wome never it: as others, the beginning of some known, fong. The word properly signifiesh littles, or rofes. Which might have four reference to the argument of this Palm, as some are of opinion. But concerning the firther, all is uncertain; as often hath been faid. See upon former Pfalmes, 7, &c. Maschil Or, of instruction.

A fong of loves Of the love between Solomon, and Pharachs daughter, typifying the love of Christ and the Church; or of the beloved ones, kings daughters attending on the bride, ver. g. In the Hebrew it is : אור ורדוף and because Solomon was called fieldiated, as we read a Sam, rs.

25. Some Rabbines, and others, have thought that Solomon might be incended by this word. This is certain, that many fuch allusions, with some little attention in the proper names, are to be found in the Scripture. See before upon names, are to be found in the Scripture. See before upon Pfalf, apone those words of the Title there, etch is the Bright-mile; and upon the Title of the 9.Pfalm. But whatever we think of that word in the Title, a greater quelifion is made concerning the argument of the Pfalm it [cf]; which from the for far my sleding that it was composed upon Solomeon marriage, and immediately applyable to him, (chough beiley) intended of Chrift, as all Chriftians maintain.) that they think it great imprint for any man to think 10. Generales by name are changed by Genebrard : Impii ut Generafes, de Solomone hunc Pfalmum exponunt, faith he. Now his reasons why it cannot be so; the first is, because the fons of Chare, the authors of this pfalm, as he takes for granted, did prophese in the time of Moses, many ages before Solomon. And though Prophess, yet that God would have Solomon an object of their prophesie, rather then David, or any other, I confess is not very likely, except we had more affurance of it. But what can Genebrard fay to us, why we should believe, that these fons of Corab here mentioned, lived in Mofes his time; whom all others conceive to have been of their posterity in David, and since Davids time? St. Jerome by name, makes them to have been keepers of the doors, and feveral porches of the Tabernacle in Davids time. But this is a mere phantie of Genebrards, onely to ferre his present purpose. 2 That the expression of this wint: palates ] Either edifices, 1 Kings 22, 39, Cant.7.4.

knowledged, that Christ is chiestly intended, and that there be other Palms where as high things are spoken of David, immediatly; though belonging to Christ more properly. A immediatly; though belonging to Christ more properly. A third argument, is, that the Apollica apply it to Christ. So they do divers other things the neverticles were literably poken of others, as all gibts meverticles were literably poken of others, as all poken of others, as all reference of things to Christ, doth not take any the list lines. That it is against the fense or opinion of all Christians (this fourth argument; ) how falle that is, I will appeal continue when though he ame not Genebradly, yet he amortism when have faid as much as he, and confuses them by diverter that have faid as much as he, and confuses them by diverter that the support of the properties of the support of the soften his own 1 fails. It is all the properties of the support of the soften his own 1 fails. It is all the properties of the support of the soften his own 1 fails. have laid as much as ne and contures them by diversible of the authorities, befides his own. Laffly, he alledgeth the Rabbins; but that alfo, not truly; or elfe St. Jerome was not in the right; who is cited by the fame Larinus to the contrary: though I will eafily yield, that all Rabbines are contrary: though I will enfly yield, that all Rabbines are not of one opinion about it; a sneither in many other things, belonging to the Plalms. Taking it therefore for general, that Solomen was the inmediate object, and that this Plalm was intended to him as an Epithalmininger marting the most appropriate the properties of the probability and almost unquefilled the properties of the probability and almost unquefilled the probability and display the probability and the probability of the most grammatical that the probability and the probability of the proba (for it is a feminin) understand thereby certain choice vir-gins (according to the custome of those times) appointed to compass about, or accompany the bride; and to sing this Psalm, properly called the beloved, or, the friends: as they Pfalm, properly called the believed, or, the friend: a they that waited on the bridgetoon, were properly called, it files if require: the friends of the bridgetoon, John, 200, though it be there in the fingular, of the "the friends because St. John Baptil speakes of himself, in particular; but under that one, more may be comprehended. A chief reason that moved him thereunto, it seems, is, the defect of an and, in the originall, to joyn the word with the former. It is ordinary among all men to compare great armies to great inundations; and by an opposite metaphor, (which otherwise would be obscure, because not so ordinary) a leffe army, or ftrength, is here compared to a little river. I a lette army, or ttrengtn, is here compared to a little river. It therefore we interpret the Pfalmift here, from that passing of Esay, (which may be, whether the author of this pfalm wrote before Esay, or Esay before him, which is uncertain) then taking the former words not literally, but as an allegorical ex. taking me tormer words not iterally, but as an allegorical ex-perifion of great first, and great semies in the world, then will the reason of the antitubes require, that by a river, (opposed to the fea. 8c. /insall means, and small forces (in comparison, 8c in appearance) should be understood. But this upon a suppositon, that the Pfalmift must be interpreted by Efay; which is the more likely, because was are directly mentioned afterthe more likely, because wars are affectly mentioned affect, wards, and God, in relation to it, as is probable, flyled, The Lords of Hofts, ver.7. & II.But again; there may be a further antithefts in this, that whereas the neighbourhood of the Sea, entitle/is in this, that whereas the neighbourhood of the Sea, or of great waters, may be the overthrow of great mountains; mount Sion, (the type of the Church) the further it flood from any fuch, themore it might be conceived out of danger. Now any tuch, the more it might be conceived out of danger. Now applying the chings to the Church of God in general, as most interpreters do, who hence infer, (and infit at large up-on it fome of them) that novelificanding the troubles and commotions of Kingdoms and Estates, the Church, by the commotions of Kingdoms and Estates, the Church, by the power and providence of God, may enjoy her peace and tranquility; this must be understood with due limitation. For etherwise, the saying of an ancient is true, thus, Non Republical in Estatify, affectified in Republica; that is, That the Common-wealth is not in the Church, but the Church in the one continued to the continued of the co ancent author. However, it is true too, and onserved by many, that by a fectre power and providence of God, the Church of God, thought it fuffer for the prefent as part; yet in processe of time, it often gains and learcast, the troubles and commotions of States and Kingdom. first, whether there be any fuch charms effectual : Exposters tirit, whether there be any tuch charms effectual: Expohers indeed upon this place rell us of fome, that have faid or written of such deaf adders, which by a natural instinct and protectioner, sie to lay one ear close to the ground, and stop the other with their tailes, because they should not hear the voyce of the charmer: they name Jerom, Augustus Cassidodor: (I had rather they had named some Naturalists) but how many had cather they had named tome reacturaries; but now many things in this kind are commonly faid, and by many believed, which upon further fearch are, and have been found falle, is fufficiently known. Plinie in his Natural Hiftory, (a man otherwise much censured for his too great credulity) faith of charms in general, maxime questionis, & semper incerte est, valeantne aliquid verba & incantamenta carminum. And else-where more particularly of these kind of charms; Varia circa where more particularly of these announcements? I arise the copini, extingenic children, vol call, multeri alcoquis frems: quippe ubi etiam ferpattes extrabi cantin, cogique in person, versus fall favre fle, vita non decreverit. Plin, lib, 8.e., 16. By occasion of which words it will not be amisse to observe, that the Heor which words it with not be anime to open very that the re-brews also conflicture a double charming; the one of greater beafts, which they call The great; a nother of creeping things, see which they call, The left scharming; as is observed by Buxtorie, out of the Talmudifts. But however Pliny makes the matter very doubtful; they that have feen maftive-dogs, of the fiercest of that kind, such as Tannars keep, when ready to flye and fasten, suddainly with a little piping, in a ready to flye and fatten, fuddainly with a little piping, in a very plain way, without any art, clint can be obterved or di-(feerned). fift filled and tamed, and then foon riter laid afterp-not to fpeck of what hath been done by the fatne man upon fierce Bult, in the view of many: they, I fly, that have feen his, as many in Suffec have done, and can bear winnerly, in need be; will not make any great quefilion, but that with art there is, or a leaft fluid paraface; and distarted thing is art there is, or a leaft fluid paraface; and that the mange of fecible: but by what art or power, either natural, or magical is another question. I am confident, by what ever I could hear or learn of him in Suffex, but now fpoken of, that he is near or tearn or man an Junes, our now spoken of male troops nor fulperfeed by any that knew him, to use any unlawful means. Neither indeed is it probable, all things confidered, But such charming they say, is forbidden in the law; and therefore magical. Its true indeed, the word is there in the Law, Deur. 18.11. Or a Charmer, &c. it is the same word there exprest: nor whether the prohibition doth extend to all kind of words or actions in that kind, that may be comprehended under that general word. For fo we may fay of the word

Plai. 4.27, it is in the verbe there of and, so in the language and the state of the language and the language an of them in this place, is no argument for the truth of the thing, in point of history and reality of fact: fince many things are spoken in the Scripture according to common opithings are spoken in the scripture according to common openion onely, or grounded upon some vulgar speech; much leffe for the lawfulnesse offic. So in the Latine congue, for example, no man makes any scruple to use Sirenum voces, and Cygnea cantio, and the like Proverbially; though he believe not the reality of either fuch Sirens in nature, or of fuch finging of the Swans before their death.
